

To build a complete "Detective Dashboard" for any family office, we must move beyond news headlines and look at the **primary data exhaust** they generate across five distinct domains.

Here is the master summary of the **Family Office Intelligence Framework (2026 Edition)**.

1. Public Market Intel (Equities & Stocks)

This category reveals the office's short-term liquidity, market sentiment, and major corporate influence.

- **Live Pulses:**
 - **The "Lagged" Portfolio:** Quarterly changes in major tech or value holdings.
 - **The "Active" Stake:** Immediate notifications of ownership exceeding 5% in a public company.
 - **The "Exit" Signal:** Sudden mass-selling (Block Trades) often happening after hours.
 - **Sources & Extraction:**
 - **WhaleWisdom / Fintel:** Scrape for **Form 13F** (historical holdings).
 - **SEC EDGAR (Live Feed):** Monitor for **Schedule 13D/G** and **Form 4** (insider moves).
 - **FinViz / Bloomberg:** Filter for "Large Block Trades" involving tickers known to be in the office's portfolio.
-

2. Private Market Intel (Direct PE & Venture)

This shows where the family is placing "bets on the future" and which industries they intend to disrupt or dominate.

- **Live Pulses:**
 - **"Club Deal" Participation:** When the office teams up with other elite families for a private buyout.
 - **Series B/C/D Funding:** Direct capital injections into startups.
 - **Board Seat Acquisitions:** When a senior managing director from the office joins a startup's board.
 - **Sources & Extraction:**
 - **PitchBook / Crunchbase:** Track "Investor Profile" activity.
 - **SEC Form D Filings:** These are mandatory notices of "Exempt Offering of Securities" for private companies; they list the investors.
 - **PR Newswire / BusinessWire:** Keyword alerts for the office name + "Strategic Investment."
-

3. Real Assets & Infrastructure (The "Hard" Hedge)

This category tracks the family's physical footprint—land, water, and the energy grid.

- **Live Pulses:**

- **Shell Entity Creation:** New LLCs registered at the family office's headquarters.
 - **In-Fill Land Purchases:** Small, quiet acquisitions of land adjacent to their existing massive holdings (e.g., Oak River Farms).
 - **Resource Grabbing:** Acquisitions of "Senior Water Rights" or industrial power permits.
 - **Sources & Extraction:**
 - **OpenCorporates:** Search by the office's **HQ Address** (e.g., 2365 Carillon Point) to find new shell names.
 - **County GIS / Tax Assessor Portals:** Monitor deeds for the specific shell names identified.
 - **State Water Boards / FCC Databases:** Search for water permits or industrial radio/drone licenses under the shell names.
-

4. Strategic Intel & "Soft Power" (The Roadmap)

This domain reveals the "Why" behind the "What." It tracks their research and talent acquisition.

- **Live Pulses:**
 - **Research Grant Flow:** What specific scientific or social problems are they funding (which usually precedes an investment)?
 - **The "Talent Flow":** Hiring shifts (e.g., moving from "Legal Experts" to "AI Infrastructure Engineers").
 - **Leadership Churn:** Senior directors leaving or joining the office.
 - **Sources & Extraction:**
 - **IRS Form 990-PF:** Public tax returns for their **Foundations** (e.g., Gates Foundation). It lists every grant given.
 - **LinkedIn "People" Tab:** Track new hires and title changes for the office's corporate page.
 - **Indeed / Glassdoor:** Crawl for new job descriptions to see what technical stacks or industries they are currently prioritizing.
-

5. The "Shadow Bank" (Private Credit & Debt)

This reveals the family's role as a lender and their view on who the "winners" of the current economy are.

- **Live Pulses:**
 - **Collateralized Loans:** When the office lends money to a company and takes their assets as "collateral."
 - **Direct Lending:** Replacing traditional banks for mid-sized corporate deals.

- **Sources & Extraction:**
 - **UCC-1 Filings:** State-level "Uniform Commercial Code" filings. These are public records showing a lien against a company's assets.
 - **Debt Market News:** Specialized outlets like *GlobalCapital* or *LSEG Lipper* that track private debt movements.

Summary Table for Automation

Category	Primary Live Pulse	Extraction Method
Equities	Ownership Changes	SEC RSS Feeds (13D/G)
Private Equity	New Direct Deals	Form D Scraping + Crunchbase API
Real Assets	Shell Activity	OpenCorporates + Local GIS Scrapers
Soft Power	Grant/R&D Shifts	IRS 990-PF PDF Parsing
Operations	Hiring/Strategy	LinkedIn Sales Navigator + Job Board Alerts

By monitoring these **five distinct streams**, you move from seeing a "static" list of what a family office owns to a **live heat map** of where their capital is flowing in real-time.
